

Schooling for Tomorrow

Selected megatrends

Helsinki, October 2008

Henno Theisens, CERI/ OECD

Mega Trends

- Trends are a starting point for thinking about the future, because:
- Trends can give us a sense of the real, factual, amount of change that is occurring in our environment.

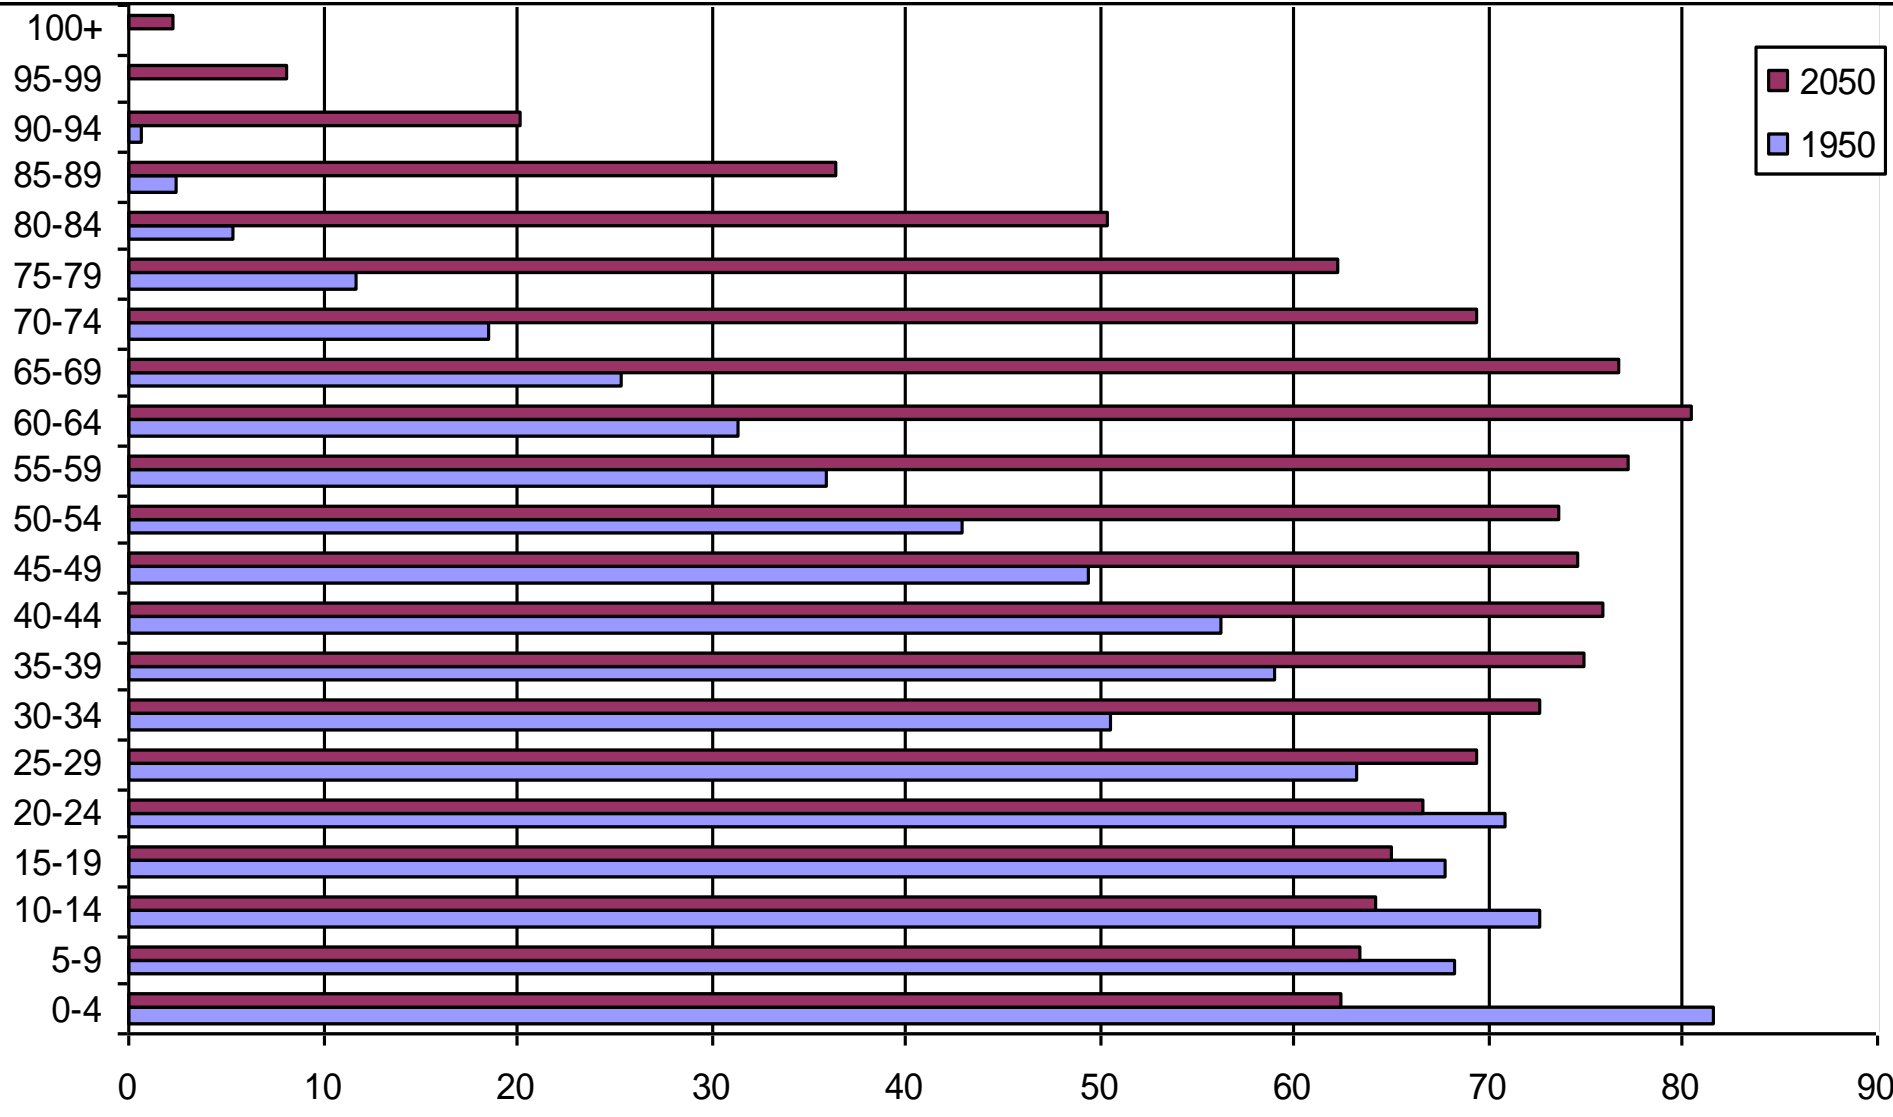

“Without the data, you're just another guy with an idea”

“Without the data your chatta don't matter”

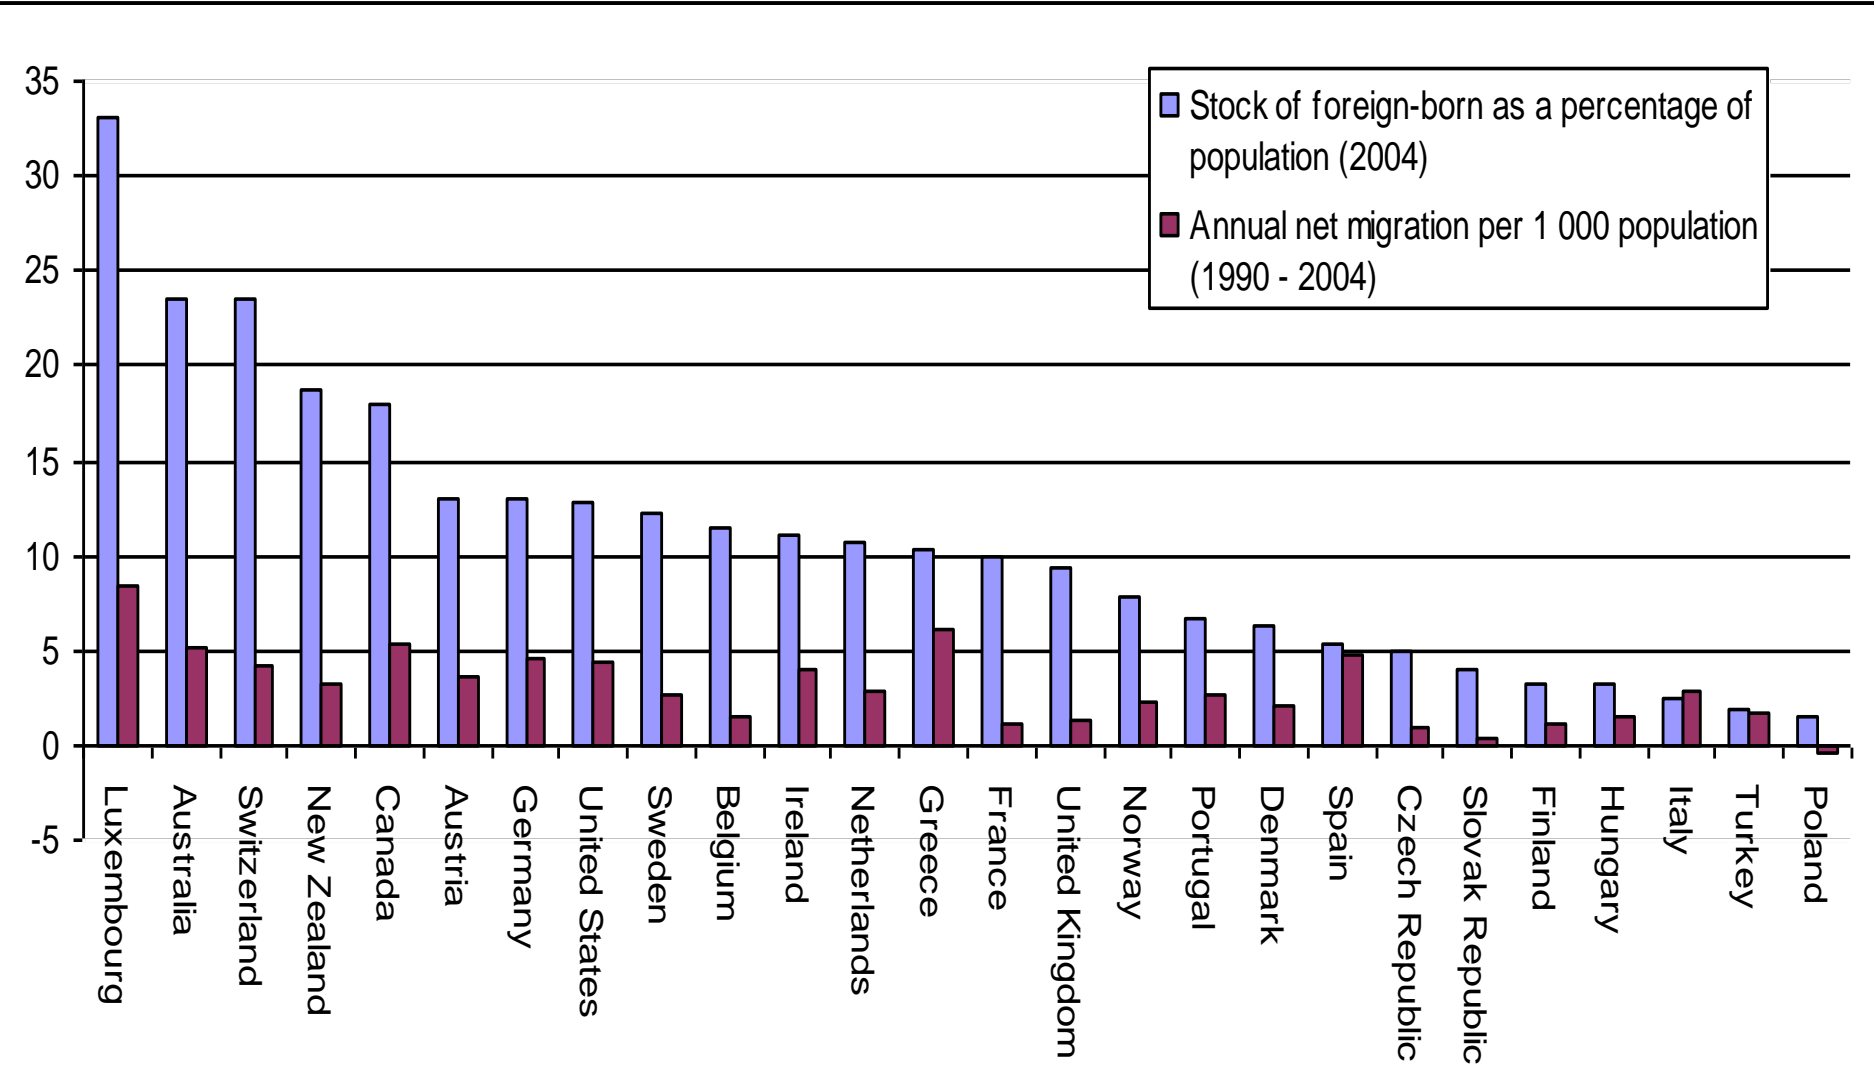

Mega trend one

AGING AND MULTICULTURAL POPULATIONS

From “bottom-heavy” to “top-heavy” age structures

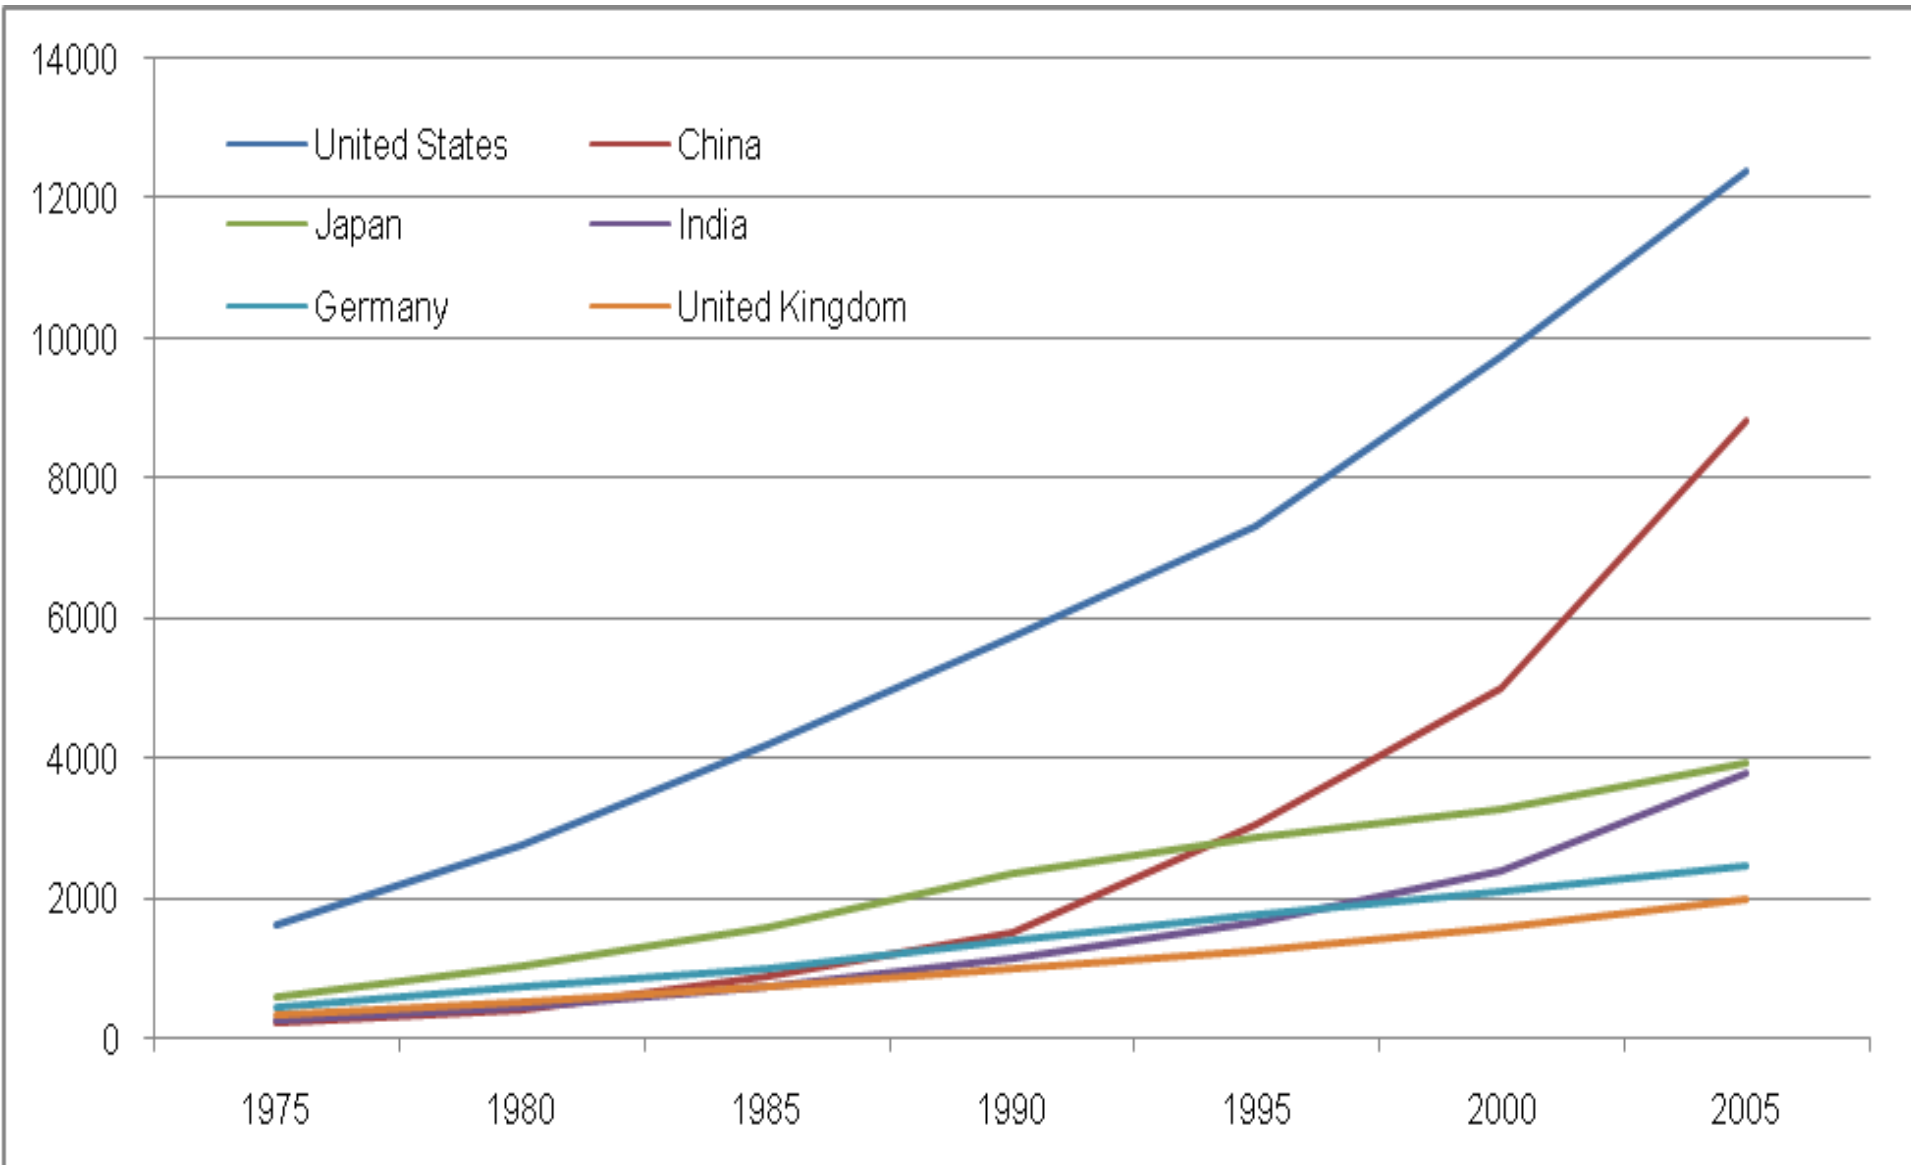

More enter than leave OECD countries, with substantial numbers now “foreign born”

Mega trend two

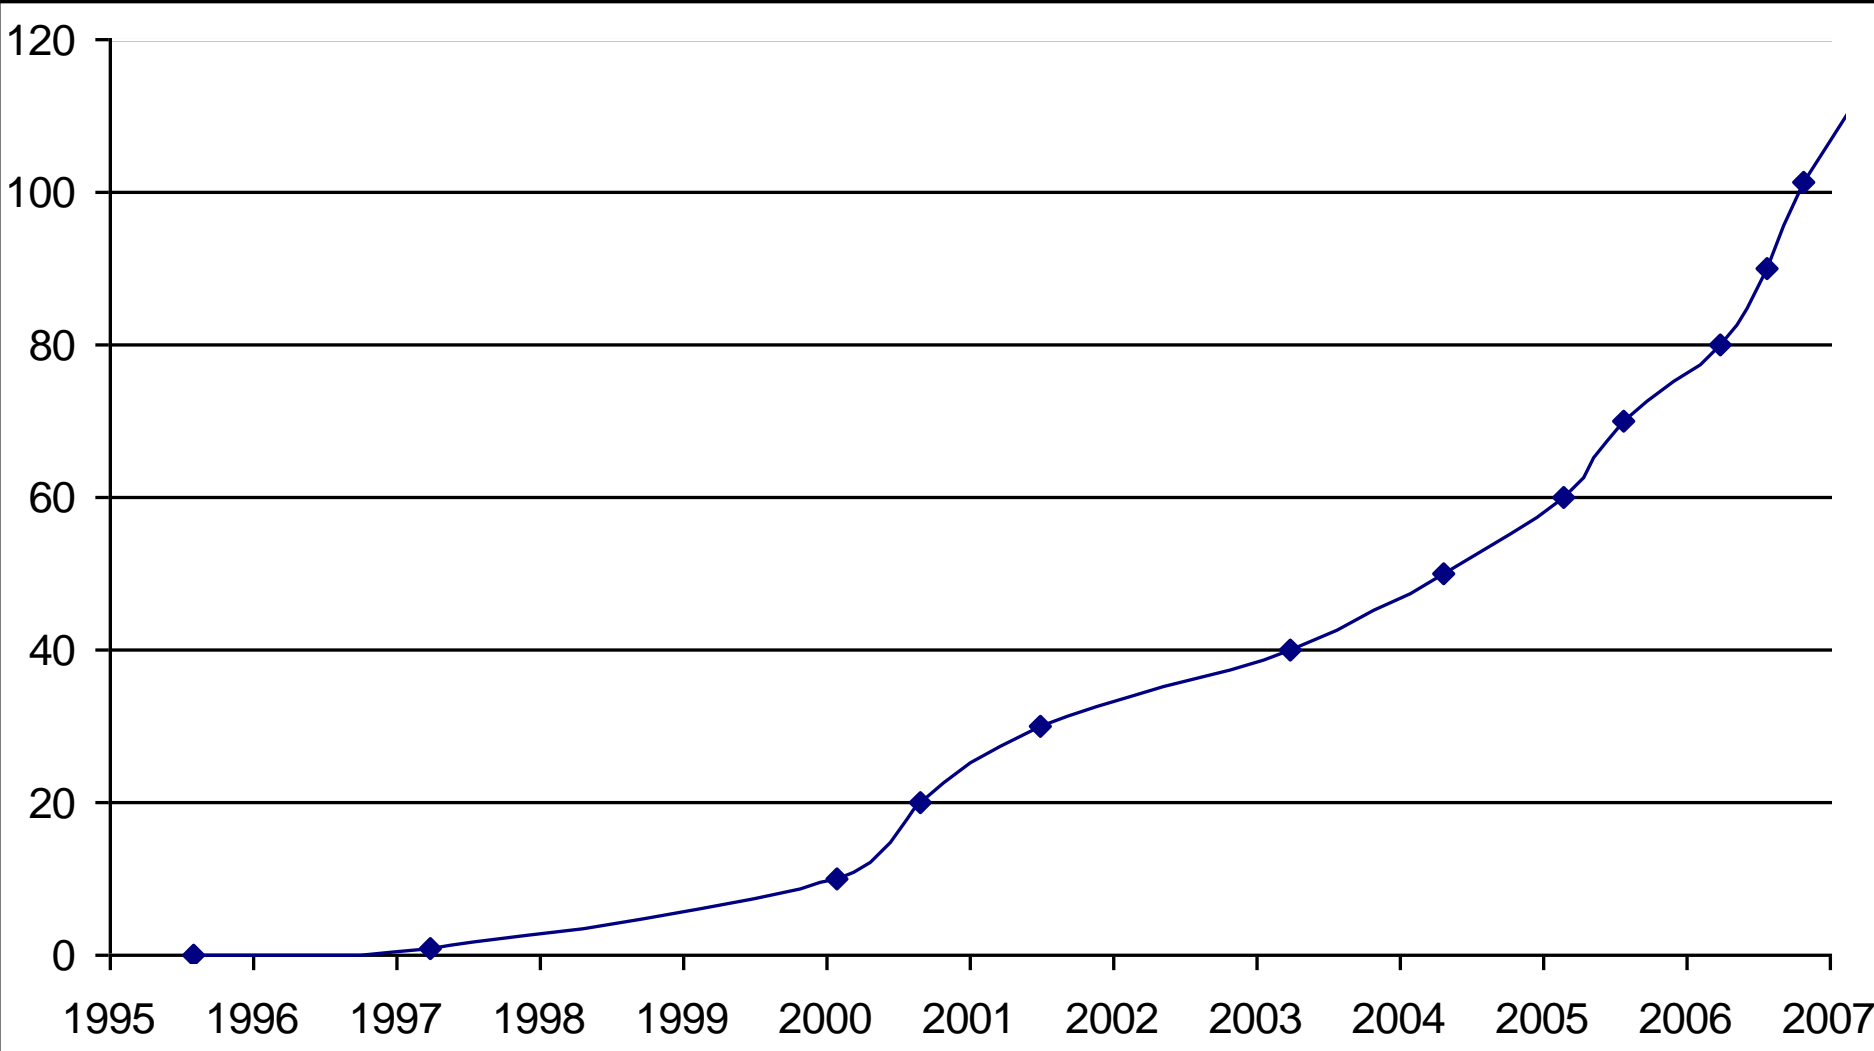

GLOBALISED KNOWLEDGE ECONOMIES

China and India are Catching Up

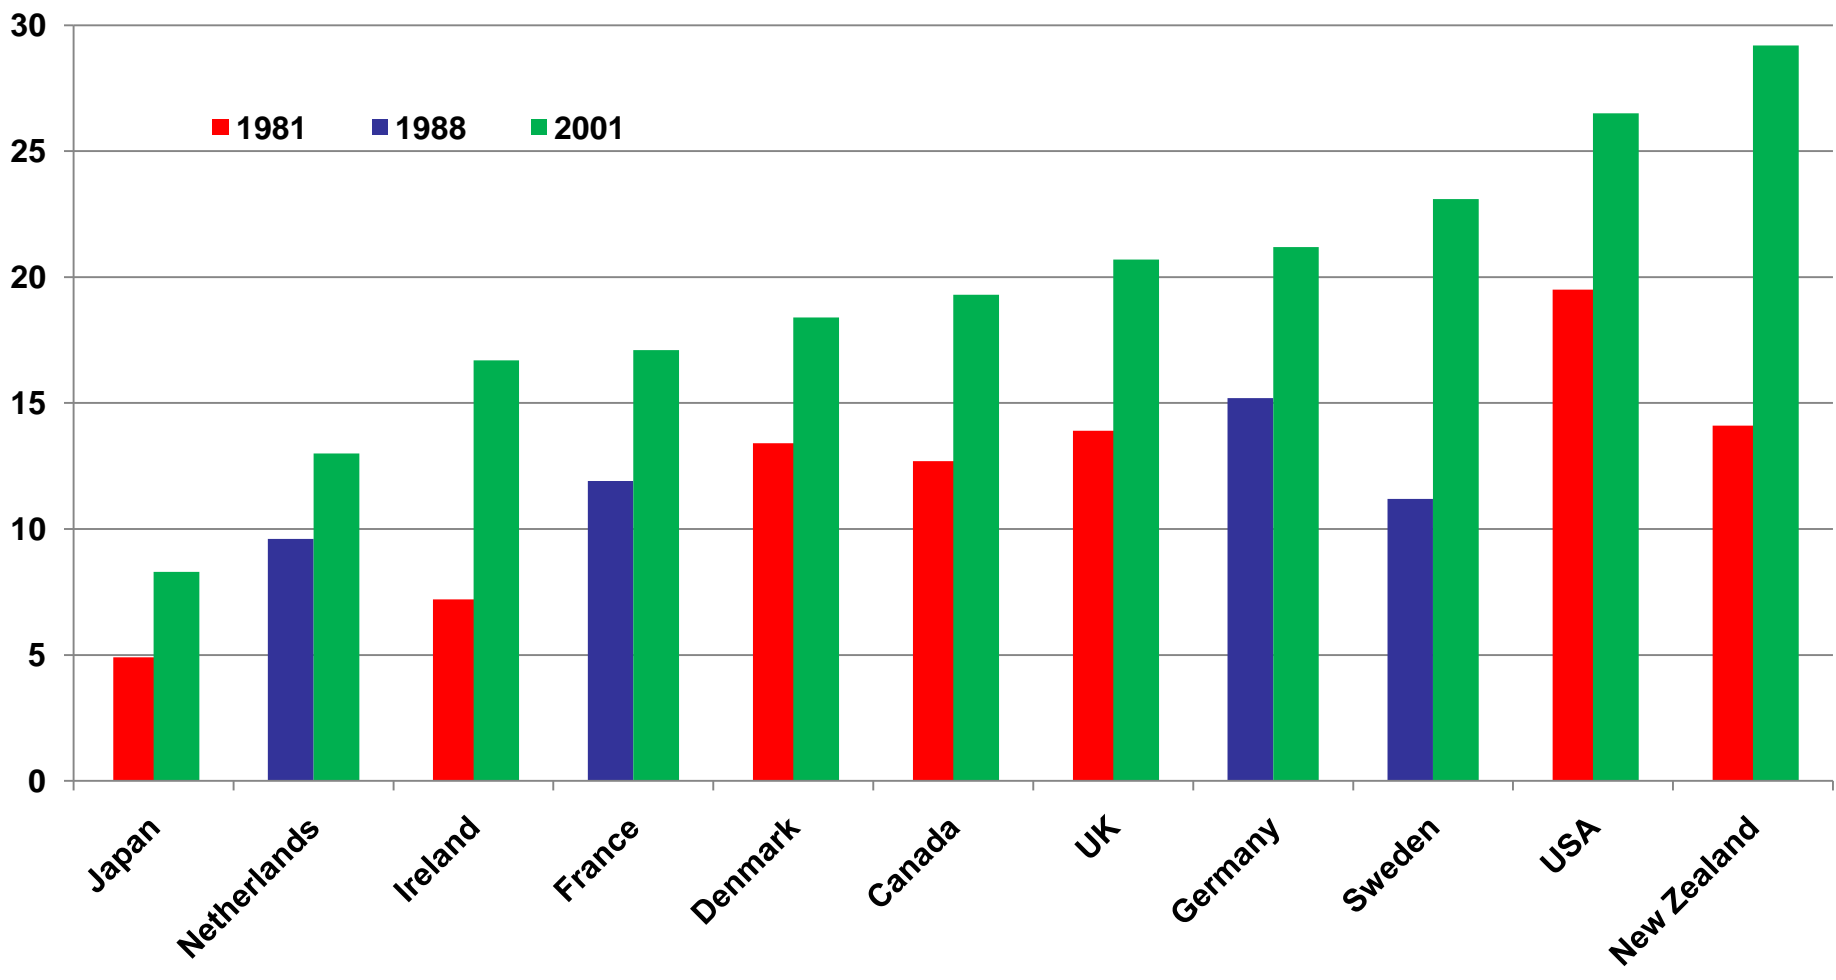

Number of websites worldwide increasing rapidly

Mega trend three

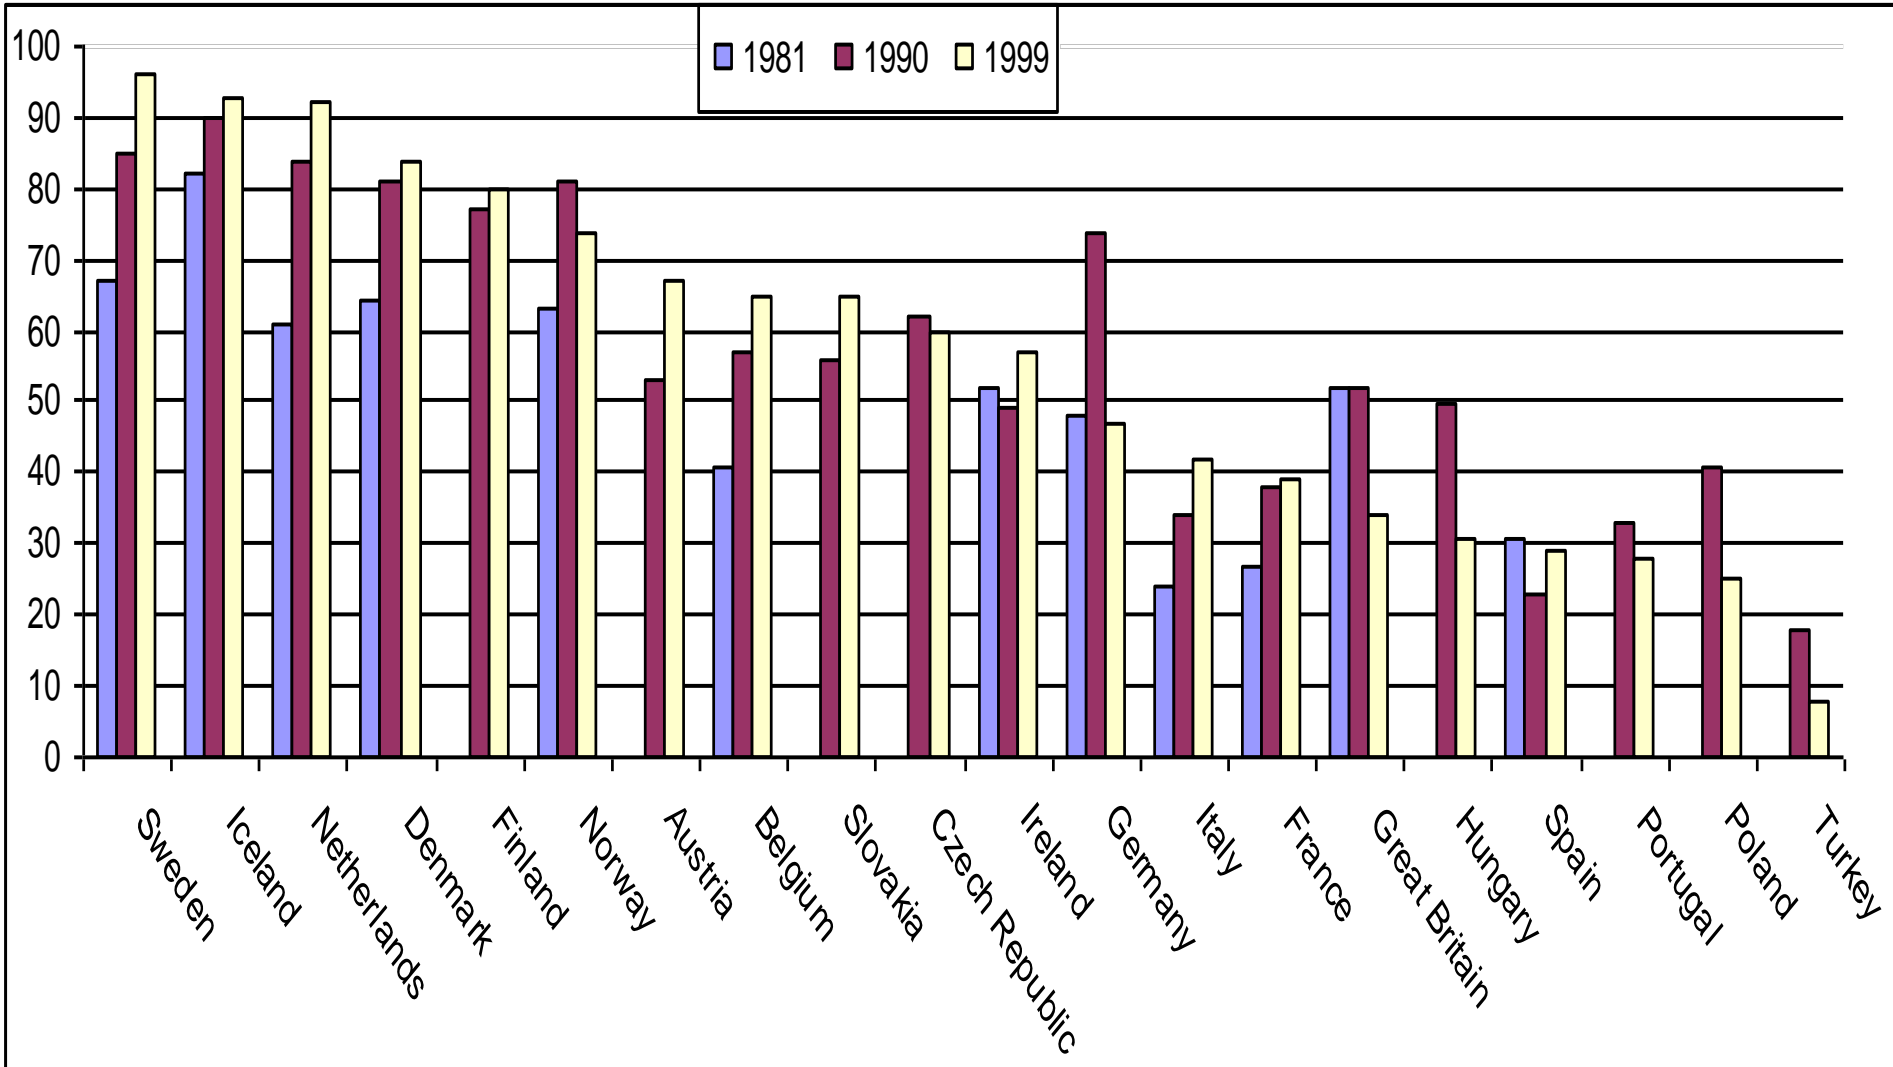

INDIVIDUALS IN FLUID NETWORKS

More single-parent families

No General Decline in Membership of Voluntary Organisations

Schooling for Tomorrow

- Schooling for life long learning
- Schooling for culturally sensitive, global citizens comfortable with their multiple identities.
- Schooling for information overload and on-line collaboration
- Schooling for strong and open individuals in fluid networks
